Comment: This application dramatically alters the skyline due to the high elevations and, in my opinion, would create a feeling of claustrophobia when travelling south from Hampton Court Bridge. Views from both sides of the river would be spoilt along with the existing station building being dwarfed by the surrounding developments. Parking seems to be pegged at the existing capacity but it seems obvious to me that the density of the development would require much more especially if a CPZ is introduced. Accompanying this the increase in road traffic would add to congestion and pollution in an area that is already very busy at peak times. In summary a bad choice for the environment visually and physiologically.
