Comment: My wife and I are opposed to the proposed moving of the base station to this site and strongly object to it. Its poor rent site is in an industrial estate a long way from residential properties. The proposed site is amongst and close to residential properties and beside the adjoining Conservation areas of Kent Town and Bridge Road and opposite the listed Kingfisher Court. The site is totally inappropriate for the station and its associated cabinets. The tower is unsightly and is much higher than the neighbouring properties.

We also understand that it is not yet established that the non thermal effects of signalling are harmless to health. Orchard School is close by.

We note that trees in Orchard Court have already been butchered to make the site accessible. What happens when they grow back?
