Comment: My wife and I object to this proposed mast in the strongest possible terms.

It is a complete eyesore, proposed for a residential area either in or right next to a conservation area. In terms of its height and nature, it is ugly, stark and completely out of keeping with the local area and will have a significant impact in the local street scene and on those who have to live near and pass by it. It is much taller than the trees around it and will stick out, both in summer but particularly in winter. It is also close to an infant school.

I find it incredible that it has not been possible to find a brownfield/industrial site that is away from residential dwellings to place this and that it could be contemplated for this site.
