Dear Jennifer Margetts,

26 April 2021

Re:- amended application 2018/3810  
Tolly Broadway + Hampton Court Stn. Redevelopment Area:-

I wish to object on certain points:-

- 1) Air Quality is already very bad in the area, so to add all the extra cars these properties will have will add to the pollution further, causing more asthma + breathing + other health problems + it all costing the NHS.  
+ us tax payers
- 2) All the extra traffic lights, will add further car emissions with the stop, starts.
- 3) If this is allowed to go ahead it is taking away precious wild life habitat for animals birds, bees + butterflies, which are needed in our help + all part of our food life cycle.
- 4) It will detract from our important historic Hampton Court palace ruining the views across from both sides of the river.

5) If this is allowed to go ahead  
it will encourage housing to go  
up all along that side of the  
Hampton Court way, destroying  
trees + green space, + may  
even encourage building on  
the playing fields of the school.

6) The ~~Hambridge~~ council have just  
at last left a strip of the  
Hampton Court way vacant  
to encourage wild life + a bees  
corridor to help our environment.  
+ this will be in vain if the  
planning dept. allows all these  
properties with the extra  
pollution they'll generate  
not just with cars but  
all their electrical items/  
computers, mobile phones etc  
household appliances, all of  
which are highly damaging  
our environment + ozone  
layer. We need more green  
space not less.  
Please turn this down

Yours sincerely  
Arl Nalshi  
(Mrs A. D. Nalshi)
