Comment: I objected to the adjacent site currently under construction. Some development was ok, but the site is being over developed.

This proposal exacerbates the position. In particular it is likely to cause significant traffic congestion at peak times. Vehicles turning right into the site will have to wait for the complete long four phases of Walton Bridge traffic lights. Because eastbound traffic will be stationary waiting for the lights. There is only one quite narrow lane westbound, so westbound traffic and traffic turning right off of the bridge will have to wait. That could be a lot of vehicles waiting. The west bound queue would soon extend past the two lane traffic light area. That in turn would block traffic turning right onto the bridge, and once that congestion builds, it takes a long time to clear, because the bridge draws in traffic from three directions and is very busy at and around peak times. The proposal is there creating serious traffic congestion. It is also over development of the site.
