Comment: Firstly, to clarify, padel bats are generally made of fiberglass or carbon fiber. They are not made of wood (as mentioned by another commenter) .

St Georges Hill Lawn Tennis Club has gone to great lengths to assess the potential noise impact upon the neighboring residents. The professional noise report ,prepared for the Tennis Club, states that the proposed acoustic screens would anticipate that no adverse noise would have any impact on the local properties.

The Tennis Club's proposed padel design also ensures that any noise will be fully minimized within the immediate area.

The Lawn Tennis Association (LTA) has officially recognised padel as a discipline of tennis in Britain, with the LTA being confirmed as its national governing body. Many tennis clubs now enjoy the addition of padel courts.

Padel is the fastest growing sport in the world. It is enjoyed by all age groups and the addition of 3 padel courts would be a great advantage to the local community.
