Comment: I write in respect of the application for the building of 3 new Padel Tennis courts at St. George's Hill Tennis Club.

The members of the Tennis Club and the estate are well served by the current facilities. There are grass, artificial surface and indoor courts for their tennis, and indoor squash and tennis courts.

The noise from traditional outdoor tennis is acceptable, Padel Tennis is considerably noisier and the three proposed courts would impinge very considerably on the other residents of the estate. The same is true of additional light pollution. It does not appear from the application that realistic simulations of the impact of noise and light pollution from 3 courts have been carried out in support of the application.

In the event that Padel is a necessary addition to the Club, it should be carried out using indoor courts, which shield the noise and light.

In consequence I strongly oppose this application
