Why can't I see my objection in your planning website?
Kind regards

I was extremely disappointed when the 2020/0691 application refusal was overturned, and now I see that two more applications have been put in to further increase the number of flats from the existing 51 by a further 60 making a total of 111.

The 2 applications if successful will completely ruin this end of Oatlands Drive which prior to 2020/0691 was made up of single family dwellings. The 2020/0691 development is a complete eyesore and will increase traffic and pollution substantially at this end of Oatlands Drive. One only has to drive down the road at any time resembling rush hour to understand the problems we already face, it can often be seen at a standstill even now, which has a knock-on affect over Walton bridge and through the town itself. Now the new plans will more than double the apartments, totally destroying the character of the area, creating gridlocked traffic and creating vast amounts of pollution affecting wild life and plants and destroying the local ecosystem.

Please please do not allow these applications to go through. With global warming on the increase, we should be looking after our environment, not destroying it.
