2022/352 Molesey Venture Supplemental Objection

Dear Mr Trendall

As there was no way of submitting images to accompany our objection, please find the following two Images - of before and after this proposed monstrosity.

The images should clearly illustrate how much sky is being obscured and how the view from the Kitchen Dining area, garden decking in our home and my private garden office will be overlooked and privacy-compromised.

Once more, this image created by applying measurement data from the REVISED plans for this building which will back on to our home.

NOTE: I am a video producer and CAA Rregisteredl drone operator - these images were based on a marker drone being positioned in the sky at precise heights and at set distances from our boundary as published on the developers' re-submitted plans.

Many thanks for your time in this matter.

Ian Nuttall
