## 1.0 Introduction

- 1.1 In March 2023, Claygate House Investments Limited and MJS Investments Limited, submitted a planning application to Elmbridge Borough Council with respect to an outline application for a development for up to 60 dwellings, associated landscaping and open space with access from Raleigh Drive.
- 1.2 The application (Ref:2023/0962) was supported by a Transport Statement (TS) that considered the likely effects of this development upon the local transport network. It was also supported by a Travel Plan Statement.
- 1.3 Following its review of the submitted documents as highway authority, Surrey County Council (SCC) have requested further information in the response to Elmbridge Borough Council, dated 26<sup>th</sup> May 2023, provided within **Appendix A**.
- 1.4 SCC's consultation response confirmed the acceptability of the proposed four-arm junction arrangement for the site access as well as the proposed works and pedestrian crossing facility at Hare Lane/Loseberry Road. However, they requested consideration of the following matters:
  - ▶ The introduction of a 20 miles per hour speed limit on the neighbouring estate roads together with a review of vehicle speeds to ascertain if traffic calming is required;
  - ▶ Dimensions provided on plans;
  - ▶ Further swept path analysis;
  - ▶ Consideration of a raised table at the Hare Lane, Arbrook Lane, Littleworth Road junction;
  - ▶ Provision of accident data; and,
  - ▶ Pedestrian / cycle access to adjacent development.
- 1.5 This Technical Note provides this further information.

## 2.0 Vehicle Speeds

- 2.1 SCC requested that the vehicle speeds within the estate were assessed to ascertain if average vehicle speeds were below 24 miles per hour, the threshold for introducing a 20 miles per hour zone without the need for additional traffic calming measures.
- 2.2 Automated Traffic Counts were therefore undertaken for seven days from Tuesday 13<sup>th</sup> June 2023 at five locations within the estate as detailed within Figure 2.1, with the locations agreed with the Senior Transport Development Planning Officer at SCC, Andrew Slater.

Figure 2.1 – Automated Traffic Counter Locations.

2.3 The full results of the ATC surveys are provided within [Appendix B](#) and summarised within Table 2.1 below.

Road	Direction	Average Speed (mph)
Loseberry Road – North ATC	Northbound	17.2
	Southbound	17.4
Loseberry Road – South ATC	Northbound	18.0
	Southbound	18.7
Raleigh Road – West ATC	Westbound	19.1
	Eastbound	18.9
Raleigh Road – East ATC	Westbound	19.5
	Eastbound	20.0
Rythe Road	Westbound	17.9
	Eastbound	18.6

Table 2.1 – Summary of ATC Survey Results.

- 2.4 Table 2.1 details that the average seven day mean for all the roads on the estate are 20 miles per hour or lower and therefore the estate is suitable for a 20 miles per hour speed limit without the requirement for traffic calming measures to be introduced.
- 2.5 However, while the results demonstrate that speeding on the estate is not an issue and the existing 30 miles per hour speed limit is acceptable, the client will fund a reasonable contribution towards a Traffic Regulation Order to enable SCC to implement a 20 mile per hour zone within the estate.

### 3.0 Proposed Site Access

- 3.1 SCC requested amended plans detailing the proposed dimensions for the access road into the site from the junction with Raleigh Road, additional swept path analysis and the provision of waiting restrictions within the visibility splays at the proposed access. The following drawings provided within [Appendix C](#), address these issues.

- ▶ Drawing 170822-03 Rev C – Proposed Crossroads Access Arrangement

- ▶ Drawing 170822-06 - Proposed Access Road Dimensions.
  - ▶ Drawing TK04 and TK05 – Refuse Vehicle Swept Path Analysis.
  - ▶ Drawing 170822-TK06 – Fire Tender Swept Path Analysis.
- 3.2 Swept path analysis has not been undertaken for the straight across movement and nor for the fire tender entering from Rythe Road as this is a cul-de-sac.
- 3.3 Given the size of the refuse vehicle used by Elmbridge Borough Council, when turning into the access road, it will pass into the opposite carriageway, a common experience at residential junctions across the country. It is noteworthy that this occurrence is fully in accordance with paragraph 6.8.1 of Manual for Streets, which states:
- "The design of local roads should accommodate service vehicles without allowing the requirements to dominate the layout. On streets with low traffic flows and speeds, it may be assumed that they will be able to use the full width of the carriageway to manoeuvre. Larger vehicles such as pantechnicons need not to be fully accommodated."*
- 3.4 As with the 20 mile per hour zone the client will fund a reasonable contribution towards a Traffic Regulation Order to enable waiting restrictions to be implemented at the site access.

## 4.0 Hare Lane / Arbrook Lane / Littleworth Road Junction

- 4.1 SCC has requested that the applicant considers amendments to the junction of Hare Lane, Arbrook Lane and Littleworth Road to facilitate a raised table in connection with SCC's aspirations for a wider 20mph zone on Hare Lane. An indicative scheme is detailed on Drawing 170822-07 within [Appendix D](#). However, we can see no necessary justification or planning reason for such an obligation with the request seemingly contrary to the requirements of Paragraph 57 of the NPPF relating to planning obligations. While it is accepted that there is some justification for the introduction of a 20mph speed limit within the estate (namely on Raleigh Drive, Loseberry Road and Rythe Road), no justification has been provided by SCC to support a wider 20mph zone covering Hare Lane. The development will not result in a material impact on Hare Lane and it has not been shown how the development will be unacceptable in planning terms if a raised table at the Hare Lane, Arbrook Lane and Littleworth Road junction is not forthcoming. Therefore, unless the necessary justification is provided, the inclusion of a raised table is considered contrary to the requirements of the NPPF and will not be promoted in connection with the development proposals.

## 5.0 Road Safety

- 5.1 To consider the existing standard of road safety on the local highway network in the vicinity of the site, personal injury accident (PIA) information has been obtained from Crashmap for the most recent 5-year period up to 1st January 2022. The study area is detailed within Figure 5.1 below, which also shows that three PIA's have occurred on the local highway network.

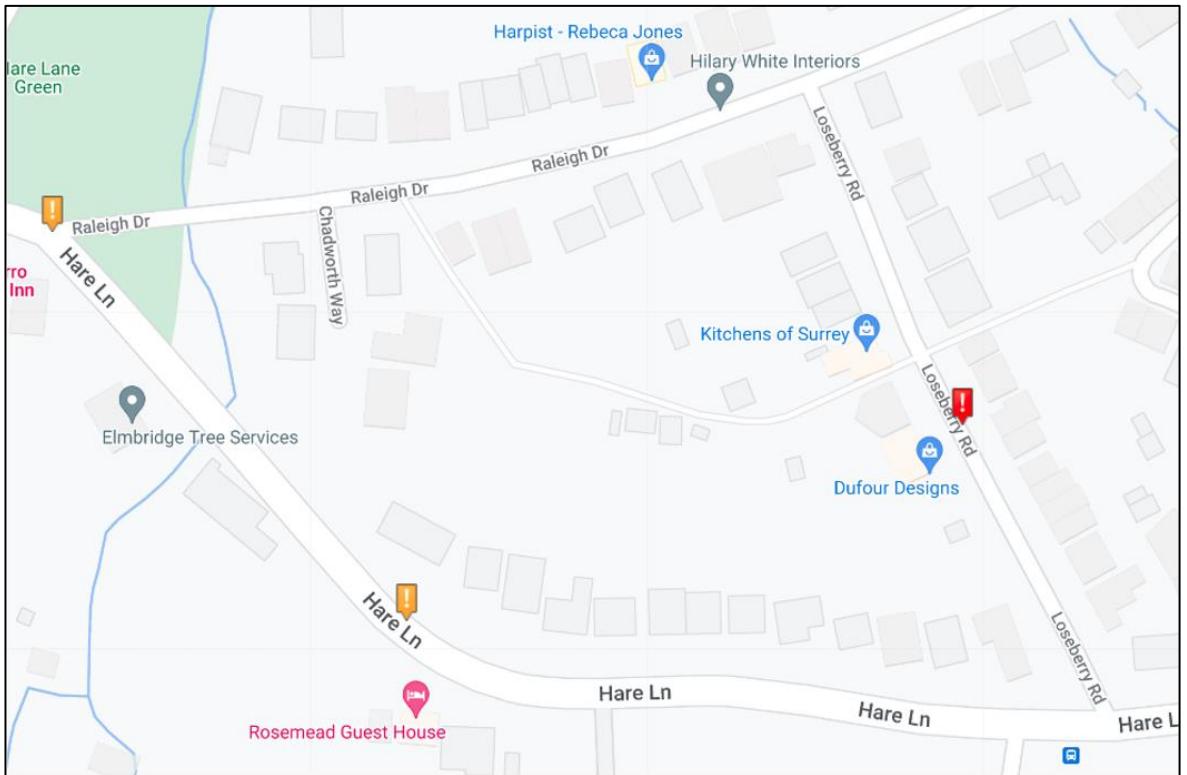

Figure 5.1 – Road Safety Area,

- 5.2 Full details of the accident data are included within [Appendix E](#), but a summary of the accidents are shown in Table 5.1 below.

Location	Date and Time	Description	Severity
Junction Raleigh Drive with Hare Lane	Saturday, 13 <sup>th</sup> May, 2017 – 3:00pm	Single vehicle motorcycle accident	Slight
Loseberry Road,	Tuesday 24 <sup>th</sup> April, 2018 – 7:32pm	Vehicle one in collision with vehicle two which was parked on the carriageway	Serious
Hare Lane	Friday 23 <sup>rd</sup> November 2018 – 08:30am	Single vehicle left carriageway and hit wall	Slight

Table 3.1 – Summary of Accident Collision Data

- 5.3 The analysis of the accident collision data shows the accidents involve drivers driving without due care and attention or poor judgement and were not down to defects in the highway. The assessment of road safety indicates that the local highway network does not suffer from any significant safety problems.
- 5.4 On this basis, it is considered that the local highway network does not suffer from any significant safety problems that result in abnormally high accident rates, and that the number and severity of the accidents in this study area is not in excess of that for an area of highway in a location of this type. There is therefore no requirement for further investigation or mitigation on the local highway network.

## 6.0 Pedestrian / Cycle Connections

- 6.1 SCC have requested that pedestrian and cycle links between the site and the adjacent development accessed from Littleworth Road should be committed to by the applicants. A non-vehicular access was shown on the illustrated masterplan as illustrated on Drawing 170822-08 within [Appendix F](#).

## 7.0 Summary and Conclusions

- 7.1 This Technical Note has provided an overview of the comments that have been made by SCC Highway Officer with respect to an outline planning application for up to 60 dwellings on land north of Raleigh Road, Claygate (Planning Ref 23/00962).
- 7.2 On the basis of this review, it is evident that the conclusions reached within the Transport Statement that has been submitted in support of application 23/00962 still remain valid. Indeed, it is clear from the additional information requested by SCC and included within this Technical Note, that the access strategy accords with national and local guidance and therefore provides a safe and suitable means of access.
- 7.3 It is therefore concluded that the proposals would not result in any material impact to the local transport network, let alone the severe impact that is referred to within the National Planning Policy Framework. As such, we retain the view that the proposals should not be resisted and respectfully request that Highway Officer revises its initial response accordingly.

Dear Jack Trendall

**APPLICATION NO. EL/23/0962**

**SITE:** Land North of Raleigh Drive Claygate Esher Surrey

I refer to the above planning application upon which you have requested our consideration of the highway and transport issues. Before I am able to provide a full response, please request the following be provided by the Applicant:

The applicant's transport consultants have previously entered pre-planning application discussions with the CHA and this is welcomed. In this respect, some of the matters set out within the Transport Statement have previously been reviewed and deemed appropriate in principle, including the following aspects:

- Proposed 4 arm, low speed, junction arrangement to access the site
- Proposed road narrowing, improved visibility and associated pedestrian crossing facility at Hare Lane/Loseberry Road

Notwithstanding the above, the CHA is aware of local aspiration for 20 mph speed limits both within the local estate and on the wider network on Hare Lane. In respect of the former, our pre-application advice stated that the proposed site access arrangement would be best supported by provision of a 20 mph zone within the estate. The current proposed arrangement would be dependent on low approach speeds to provide a safe arrangement and the provision of a 20 mph zone would assist this. We recommend that the designers consider provision of a residential 20 mph zone and review the speeds within the estate to see whether additional traffic calming features are required to reduce speeds

commensurate with this. Where average speeds are below 24 mph then additional supporting traffic calming measures within a 20 mph zone are not required.

The effectiveness of the proposed 4-arm junction arrangement would also require visibility splays free of on-street car parking and therefore the Designers' Response to the recommendation for supporting Traffic Regulation Orders (TROS's) within the Road Safety Audit is not accepted and TROS's should be provided on the approaches.

In summary, a residential 20 mph Zone should be considered within the estate and traffic speed information provided and formally submitted to establish whether additional supporting traffic calming measures are required. Supporting TRO's should be provided within the visibility splay areas at the proposed 4-arm site access junction.

Additionally, no dimensions are shown in for the proposed access arrangements onto Raleigh Drive in respect of carriageway and footway widths. These dimensions should be shown, and vehicular swept paths provided for a refuse vehicle entering and exiting the site and passing a car on the first section of access road. The submitted swept paths do not include the site access junction.

In respect of aspirations for a wider 20 mph Zone on Hare Lane, provision of a 'raised table' junction at Hare Lane/Arbrook Lane/Littleworth Road would support this and enhance the proposed pedestrian crossing facilities at this location by providing low speeds and priority to pedestrians. The consultants should therefore consider revising and enhancing the proposals in line with the above, supported by an additional Road Safety Audit.

The pre-planning advice stated that up to date Personal Injury Collision data for the surrounding highway network should be provided and reviewed and this was not included within the Transport Statement and should be provided as part of the planning submission.

Opportunities for pedestrian and cycle only connections between the site and the adjacent development accessed from Littleworth Road should be committed to by the Applicants.

The provision of a commitment to a 'Car Club' at the site along with the submitted Travel Plan Statement are welcomed and the latter will be reviewed in due course. A commitment to provision of Construction Transport Management Plan will also be required, particularly in view of the restricted headroom at the Claygate railway bridge and the existing weight limit on Raleigh Drive.

Please request that the Applicant provides the above amendments/information in sufficient time so that we may respond before your deadline for determination. Please ensure that the response to this letter is in writing and all appropriate documentation, as requested, is attached.

Yours Sincerely,

Andrew Slater
