Subject:16-18 Oatlands Drive 2022/3796

Hi Clare

The swept path in the submitted Transport Statement used a 11.2m. If anyone asks this is stated on the plans. The tracking therefore meets the requirements set out below

Kind Regards

Matt Richards BSc(Hons) MSc MRTPI

Dear Matt,

The RPS feedback was received yesterday afternoon and has commented that the sequential test is acceptable. The detail will be publicly available on the website in the next 48 hours and will be included on the members update sheet later this week.

Our refuse provider has asked me to clarify if the swept path analysis meets the minimum requirements for turning space for refuse vehicles.

The requirement is;

“Adequate turning space should be provided if the vehicle is expected to access the development. For tracking purposes, the dimensions of the current collection vehicles are 10.6 metres long and 3 metres wide. The minimum turning circles are 19.9 metres (kerb to kerb) and 21.6 metres (between walls).”

Please can you confirm that this was the dimensions used?

Kind regards,

Clare

 External email >

Good Morning,

I have no issues about the drag distance. The Swept path does look tight can it be confirmed it meets out minimum requirement for turning space.

Adequate turning space should be provided if the vehicle is expected to access the development. For tracking purposes, the dimensions of the current collection vehicles are 10.6 metres long and 3 metres wide. The minimum turning circles are 19.9 metres (kerb to kerb) and 21.6 metres (between walls).

Thanks

Matt
