Comment: 1. The surface and waste water sewer for the area is already working at capacity. When there is torrential rain, waste water (including sewage!) bursts through manholes onto existing residents' property. Adding an additional "6 houses (2 detached and 2 pairs of semi-detached) and 3 flats and associated hard and soft landscaping" will without a doubt push more water into the sewer and make this problem worse.

2. Traffic on Claygate lane is already dangerous for children during the school run. The extra traffic (coupled with an additional access road) will make matters worse.
