1.76		Modified grassland intensively managed through horse grazing and appears to have previously received nutrient enrichment / application. Passes condition critera 1, 3, 6 and 7. Fails condition criteria 2 (sward height is uniform and very short due to intensive grazing), 4 (Physical damage and disturbance is evident in more than 5% of the area) and 5 (cover of bare ground is greater than 10%). Located within Area B.
0.00		Single mature willow tree within horse-grazed pasture field. Tree will be retained as part of proposals. Passes condition critera 1, 2, 3, 4 and 5. Located within offsetting Area B.
0.00		Area of rank, unmanaged and species-poor grassand dominated by a small number of grass species. Forbs are limited in number and diversity and are being outcompeted by grasses such as cock's-foot, false-oat grass and undesirable species such as stinging nettle thistles and dock species, due to a lack of management. The grassland does not appear to have previously been subejct to significant levels of nutrient enrichment / application and has been unused by the golf course as if forms part of the floodplain to the River Mole. Fails condition criteria 1 and is automatically considered to be in poor condition. Also fails criteria 4 due to encoraching scrub, 5 due to the cover of undesierable species (docks, thistles, nettle etc.) and 6, due to a low species richness of less than 10 species per m2. Located within offsetting Area C.
