Comment: I think the development of a second reservoir would make a lot of practical sense for the course and vulnerable areas around the River Mole. Not only will it provide the ability to manage the flooding more effectively by preventing the worst of the floods in the winter months, it will also provide a new habitat for wild life year round.

The summers seem to be getting more warm and damaging to the courses and this would protect real damage to both courses and the natural habitat.

I think this makes all kinds of sense and providing the build is well managed to protect the current habitat as much as possible, will be a positive addition.
