Comment: I support the building of a reservoir at Burhill Golf Club as it will aid the capture of flood water from the River Mole which will benefit the local area. I also believe that there will be benefits of more open water to wildlife and will help the club's aim of improving the biodiversity of the area. With increasingly hot summers and a lack of water, the turf on the course needs to be regularly replaced through seeding. This obviously uses power and therefore more CO2. Using flood water from the reservoir would help prevent this.
