Comment: I fully support this application for a number of reasons;

Firstly, it will allow the golf club to better manage its water resources over the summer months

Secondly, an additional pond will help support and maintain a diverse environmental habitat, in a similar manner to those already in situ.

Thirdly, increased abstraction from the River Mole will assist in managing flood risk from locations further downstream such as Molesey, which have suffered serious flooding within my lifetime. Such risks are only likely to increase with the impact of global warming.
