Comment: The proposed scheme has many benefits both to the Club and to the local community which benefits from having such a great Club locally.

The storage of excess water being acquired from the River Mole has many advantages and is a solution that accepts and tackles the increasingly wetter winters and drier/hotter summers. The new reservoir will capture water from the river Mole which floods on a regular basis and will probably get worse and it therefore makes sense to use this natural source. This application should therefore be approved.
